

Abraham Lincoln Bridge Surrounding Area

Maps Produced by Sam L. for GEO 409, Department of Geography
University of Kentucky. Data from Kyfromabove.ky.gov

The map on the left shows the surrounding area of where the bridge is located. This data is from 2013 and shows how traffic may have been an issue at that time, due to the lack of lanes. The map on the right shows the result of the construction of the bridge. It is evident that traffic is much less of an issue.
